

IntuoData[®]
Smart AI Data Engine

"Powered by applied psychology for your business success"

DATA SHEET

INTUODATA, INTELLIGENT APPLICATION GENERATOR FOR ADVANCED DATA MANAGEMENT

IntuoData is the only next-generation Smart AI Data Engine, developed by Hermes Digital Consulting, built on a JavaScript programming engine and designed through the scientific application of psychology. **It combines AI with a Scientific Cognitive Psychology Model** to create and customize sophisticated applications for complex data management.

IntuoData interprets data according to its nature, eliminating the need for coding. Traditional applications structure data based on their source. But IntuoData, thanks to this innovative concept, enables more efficient data management, significantly reducing implementation and management costs. This factor leads to a noticeable improvement in ROI.

IntuoData is not just an **AI Assistant, Data Management tool** and a **No-Code Generator**; it is an innovative **AI Avatar, AI Powered Application Generator, Custom Input Fields, Decision Assistant, Graphic Engine, Meta Platform, Premier Page, Support up to 24/7.**

That's why IntuoData is unique in the market.

IMPLEMENTATION AND USE

IntuoData provides databases for any type of organization, with customizations designed in minutes or hours compared to traditional applications. Users don't need to be programmers, and there's no heavy reliance on the IT department. IntuoData efficiently manages documents, audio, video, and complex data.

Applied psychology in IntuoData is your competitive edge

AI AND PREMIER PAGE

IntuoData incorporates an AI avatar to solve all user problems.

The IntuoData Premier Page, customized for each organization, integrates all the complete information status into a single dashboard.

With IntuoData, AI and PP simplify your decisions

SERVICIO DE FORMACIÓN

The HDC Training service offers in-person and online IntuoData courses, from beginner to advanced levels, for administrators and users.

INTUODATA ensures top-quality training

DOES YOUR ORGANIZATION NEED INTUODATA?

New Data Management Applications

Modernize and unify existing IT systems or those with legacy architectures that require a new front-end and a substantial improvement in data management, without replacing the infrastructure in use.

INTUODATA integrates easily with applications such as CRM, Oracle, and SAP, providing more efficient and cost-competitive solutions.

INTUODATA is applicable to all sectors and areas of the organization: Management, Finance, HR, Legal, R&D, Engineering, Marketing, Sales, Logistics, and more.

Organizations using INTUODATA express total satisfaction
